

Campus Solution

An Olivia Greets Campus solution delivers consistent, updated information at multiple points around a campus while directing visitors to the appropriate department by leveraging cutting edge technology.

OVERVIEW Universities and other large campuses where visitors need to quickly locate departments have always struggled with being able to provide students and visitors with necessary directions and information in a cost effective manner. Standard communication boards are unprofessional and difficult to manage and security guards or information booths are entirely too expensive to keep staffed throughout a campus. While some organizations have chosen TV monitors or other solutions that do not leverage the latest technologies, there is now a better solution.

FEATURES

The Olivia Greets system will perform all the following and more:

- Greet your visitors at your entry points
- Provide direction around your campus
- Unlock doors to allow visitors access to secured areas
- Display general information
- Provide digital signage
- Easily update from our centralized portal
- Provide video and audio archival for added security

USE CASE

The Olivia Greets touch panel monitors can be placed at the entry points of a campus allowing for information to be delivered to students, faculty and visitors and also for greeting visitors and directing them to the appropriate department. Upon arriving at the correct department, your visitor can touch another screen and ask for their host and our avatar will contact the host to come and retrieve the guest. The system can also be configured to unlock doors to remotely allow access to certain areas.

CONTACT

About Olivia Greets: Olivia Greets is the world's first avatar-based virtual greeting and assistant system. The complete Olivia Greets system is managed via a secure, web-based portal and consists of a touch screen panel, customizable features, telephone answering services and access control and is used in a wide variety of industries.
