

Education Solution

Schools looking for traceability and efficiency in the pickup of children turn to the Olivia Greetings system to revolutionize the pickup process and enhance security.

OVERVIEW School administrators face an uphill battle nowadays when it comes to making sure each one of their students gets in the right car with the right person each and every time they are picked up from school. The process is challenging as various people – ranging from moms to dads, from guardians to friends – might be approved to pick up children from school. Custody issues might further complicate the situation. By implementing an Olivia Greetings solution, the pickup process becomes traceable, more efficient and can relieve the teacher from having to make difficult decisions as parents garner more control of the process.

FEATURES

The Olivia Greetings system will perform all the following and more:

- Greets the individual at the door of the school
- Record the interaction (audio and video)
- Allow parents to manage preferences via portal
- Send message to parents after their child has been picked up
- Print required informational documents and forms
- Provide customizable digital signage

USE CASE School districts take advantage of the Olivia Greetings features for the benefit of everyone involved in the pickup of children, from the faculty, to the parents to the children themselves. Not only does the system record the interaction of the visitor – which is an excellent tool to stop people from pursuing a criminal act – but it also proactively reaches out to parents to let them know their child has been picked up from school. From an administrative standpoint, the system provides digital signage which can be used to message information to students or faculty about relevant events for the day.

CONTACT

About Olivia Greetings: Olivia Greetings is the world’s first avatar-based virtual greeting and assistant system. The complete Olivia Greetings system is managed via a secure, web-based portal and consists of a touch screen panel, customizable features, telephone answering services and access control and is used in a wide variety of industries.
