

Complement Solution

The Olivia Greet's Virtual Receptionist system is the perfect solution to complement your existing receptionist.

OVERVIEW

The receptionist position is an important part of your company's appearance as it is often times the first impression your guests have of your company. Often times the receptionist is not at their desk due to too many tasks being put on their plate. The Olivia Greet's solution allows you to manage and customize how your guests are greeted every time they walk into your lobby. The solution provides consistent and customizable solutions for businesses of any size, from small companies with one office and to large companies with multiple offices.

FEATURES

The Olivia Greet's system will perform all the following and more:

- Greet the individual at the door of the school
- Allow employees to manage preferences via portal
- Answer your phones
- Provide customizable digital signage
- Provide access control
- Keep the visitor log online and confidential

USE CASE

The nature of the receptionist position dictates that they will eventually be pulled away for other activities or simply take a break or vacation. Furthermore, the vast majority of receptionists do not work outside of normal business hours which leave many visitors and deliveries completed unattended. When the guests arrive during these times, who greets them? Do these potential clients receive an impression of your business? Furthermore, how is information communicated to your visitors or employees? The Olivia Greet's solution presents a better way to manage all of this and more.

If the receptionist happened to not be there when the guest arrived, Olivia Greet's would have offered your potential new client an intriguing first impression with a screen that welcomed them to your office with a personalized message and instructed them to touch the screen to be greeted. Your avatar would welcome them to your company and ask them who they are here to see – Just as a receptionist would do. After Olivia Greet's gathers the relevant information from the visitor, a live call center agent would contact the host to let them know their guest had arrived.

CONTACT
